FullStack Developer with **over 4 years** of experience delivering **modern, high-performance** digital solutions. Skilled in transforming complex ideas into **scalable, production-ready** applications with a strong focus on clean, maintainable code and seamless user experiences. Passionate about building meaningful technology that drives **real value**.

Work history

Mar 2021 - Mar 2022 **Personal Projects**

Frontend, Puerto Vallarta, Jalisco, Mexico

- **Mercado Libre Clone (UI Layout) | React.js, CSS, HTML**
User interface layout of Mercado Libre. Project focused on responsive design and visual structure using Flexbox and Grid.
- **REST API Consumption | React.js**
Application that consumes data from an external REST API to display dynamic content. Implemented HTTP requests using fetch and axios.

Feb 2022 - Mar 2024 **Programmer Analyst**

Grupo Vidanta, Puerto Vallarta, Jalisco, Mexico

- **Restoration and optimization of an application:** After the removal of critical code, I resolved issues ensuring on-time delivery.
- **Adaptation to various technologies:** I adapted to various technologies to support the team and streamline project delivery.
- **Design and wireframe layout:** I developed client requirements, ensuring functional interfaces.
- **International collaboration:** I self-taught English to collaborate with international clients and facilitate communication within the team.

Feb 2024 - Apr 2025 **Personal Projects**

FullStack, Puerto Vallarta, Jalisco, Mexico

TechShot (E-commerce) | React.js, Redux, Node.js, Express, MongoDB Atlas, AWS.

- Full-stack development of an online store.
- Implemented shopping cart functionality.
- User authentication with JWT.
- Admin dashboard for product management.
- Deployed on AWS (S3, EC2, CloudFront, Route 53).

SocialApp (Discord-like Social Network) | React.js, Material UI, Node.js, Express, MongoDB, WebRTC, Socket.IO, AWS.

- Built a modern and responsive interface using React and Material UI
- Implemented secure authentication and real-time chat with Socket.IO
- Integrated WebRTC to enable video calls with up to 4 users
- Developed the backend API with Express and managed the database in MongoDB Atlas
- Deployed the entire application on AWS with a scalable and secure infrastructure
